

An **emergency** is when something happens and you need to get help right away.

Some examples are: someone gets very sick or hurt badly & needs a doctor right away; you need a police officer; you need a fireman; or you are all alone, scared and need help.

If any of those things happen you can get help fast by calling

from a phone.

Dial 911 (and hit send if you are calling from a cell phone)

Stay Calm.

Speak Slowly.

Give your first and last name.

Tell the person what is wrong.

Tell the person where you are. If you don't know, stay on the phone and they will find you.

If you can't stay on the phone or talk, don't hang up! Leave the phone off the hook or just put it down.

Do what the 911 person tells you to do. Listen carefully.

Stay on the phone until help arrives.
